

Zest Dental Solutions and The Pathway join forces to elevate continuing education in restorative dentistry.

Industry leading dental manufacturer teams up with a renowned continuing education provider in the oral surgery and implantology space.

Carlsbad, CA – (April 15, 2024) – Zest Dental Solutions, a global leader in innovative dental solutions proudly announces a strategic partnership with The Pathway. Founded by Justin Moody, DDS and based in Arizona, The Pathway is a continuing education program that teaches dentists how to place dental implants with a live surgical component. Their mission is to empower dentists across the nation to hone their skills through continuing education.

This was naturally in alignment with Zest Dental Solutions' own mission of offering advanced implant full-arch continuing education courses through ZestEducation, their educational branch which is based in Las Vegas, Nevada. In addition, Zest's launch of their revolutionary hybrid fixed and removable overdenture solution, LOCATOR FIXED®, created a unique opportunity for these world-class educational brands to unite to create a never before seen full-circle restorative dentistry educational offering.

"We partnered with Zest because of the industry-changing introduction of LOCATOR FIXED®. This revolutionary technology changed the game as it utilizes the same abutment for removable or fixed procedures. This creates achievable, predictable results every time."

- Dr. Justin Moody, Founder, The Pathway

Tom Stratton, CEO Zest Dental, also commented, "Fusing the surgical training available through The Pathway with the overdenture training available through ZestMastership, dental professionals can expect to benefit from the synergies created by this collaboration, gaining access to a comprehensive array of educational programs designed to elevate their clinical skills, expand their knowledge-base, and drive practice success. Together, Zest Dental Solutions and The Pathway are poised to shape the future of dental education and inspire excellence in patient care."
